## CHPE Testimonials

The instructor is the expert in the field of HIPAA compliance. His experience in establishing benchmarks for HIPAA policy and procedure is far superior to anyone in today's market. He brings actual live learning experiences and practical applications to the classroom and is able to use this experience to help companies build programs that can potentially avoid costly and lengthy HIPAA legal actions.

**Strengths of the course:** Flexibility of the online format, instructor was highly knowledgeable in HIPAA and in all InfoSec areas

The course allowed me to become very well equipped to serve in the capacity of the privacy and security officer role to protect our PHI and ensure our compliance with HIPAA regulations. The one-on-one instruction permitted the format and pace of the course to be tailored to my needs. The course materials were very good in they provided an introduction to the broad concepts—tying them together—then went into more detailed information. I would recommend this class and Instructor to anyone needing HIPAA training. Although the website used to deliver the training experienced some glitches one day, we worked through the minor annoyance. The benefits of the one-on-one training greatly outweighed the glitches and would recommend it.

The training provided by Chris Apgar was thorough, and tailored to our company's needs. Chris was willing to respond to questions about specific client situations and provide the legal reasoning behind his assessment. He also brought the legislation "to life" through examples of real companies and their challenges. The sessions provided by Chris were interactive and engaging, far more than anyone expected.
